## Professional Summary

**Software Engineer with 6+ years of experience** in building robust and scalable **mobile and web applications** using **React Native, Next.js, and Flutter**. Successfully delivered **10+ cross-platform products**, including **blockchain wallets, e-commerce platforms, and social applications**, with a strong focus on **architecture, performance optimisation, and clean, maintainable code**. Actively **open-source contributor**, particularly in projects aimed at enhancing **UI responsiveness and developer experience**.

## Skills

- **Languages & Frameworks-** React Native, Expo, React.js, Next.js, JavaScript, TypeScript, Dart, Flutter, Node.js, Express.js
- **State Management & API-** Redux, React Query, Apollo Client, GraphQL, REST APIs
- **Databases** - Firebase, MongoDB, watermelonDB, SQLite
- **Tools & DevOps-** Xcode, Google Play Console, App Store, Git, AWS (Lambda, S3, SNS, Cognito), Socket.io, Pusher Client, Stripe, Razorpay, Klarna, Twilio, Branch.io, Slack, Jira, Microsoft Teams, Postman, Cursor
- **Blockchain-** Algorand, WalletConnect, Smart Contracts, crypto, algosdk
- **Testing** - Jest, Cypress, Detox, React Native Testing Library

## Experience

### Broadway

Mobile Developer - Android/iOS

Sep 2025 - Present

Gurugram, Haryana

- Spearheaded the end-to-end development of the Broadway application from scratch, contributing to architecture, development, and deployment.
- Diagnosed and resolved critical bugs, ensuring seamless functionality and an enhanced user experience.
- Optimised application performance, improving speed, responsiveness, and overall efficiency.
- Conducted code reviews and mentored junior developers, promoting best practices and coding standards.

### Quokka Labs LLP

Software Engineer L2

Aug 2023 - Aug 2025

Noida, Uttar Pradesh

- Developed scalable mobile applications using React Native and Flutter.
- Designed architecture for social media apps and crypto apps to ensure a seamless user experience.
- Conducted comprehensive testing and debugging of mobile applications, ensuring high quality and stability.
- Conducted code reviews and mentored junior developers on coding standards.

### Singsys Software Services Pvt Ltd

Software Engineer

Sep 2020 - Aug 2023

Lucknow, Uttar Pradesh

- Architected and developed distributed mobile applications using React Native and scalable web applications using React.js.
- Automated software delivery through integrated CI/CD pipelines, ensuring faster and more reliable releases.
- Created unit, integration, and E2E tests for robust QA.
- Maintained documentation for development and handover

## Education

---

<b>Babasaheb Bhimrao Ambedkar University (A Central University) Lucknow</b> <ul style="list-style-type: none"><li>• MCA with 8.25 CGPA</li></ul>	<i>Aug 2017- Sept 2020</i>
<b>Dr Ram Manohar Lohia Avadh University, Ayodhya</b> <ul style="list-style-type: none"><li>• BCA with 71.33%</li></ul>	<i>July 2013- Oct 2016</i>
<b>Sri Sai Inter College, Barabanki</b> <ul style="list-style-type: none"><li>• 12th with 79.60%</li></ul>	<i>July 2010- June 2012</i>
<b>Yug Nirman Inter College, Baranaki</b> <ul style="list-style-type: none"><li>• 10th with 69.66%</li></ul>	<i>July 2009- June 2010</i>

## Open Source and Libraries

---

- **@harshatkishor/git-commit**
  - Automates Git commit workflows with customizable templates and validation
  - Ensures consistent commit standards while streamlining the development process
- **@harshatkishor/rn-responsive**
  - React Native package for building responsive, adaptive UI layouts
  - Ensures consistent design and usability across all device sizes

## Projects

---

- **Broadway Live** – Marketplace application for new-age brands, enabling product discovery and seamless transactions.
- **Collate** – Multi-service booking app for scheduling and managing diverse services on one platform.
- **Jasiri Wallet** – Secure Algorand blockchain wallet for managing digital assets and transactions.
- **Suntec+ Eats** – Food delivery platform with real-time order tracking and optimised user experience.
- **Jumper AI (Vonage)** – Conversational commerce platform enabling chat-based customer interactions and transactions.
- **SWI (Singapore Watch Insider)** – Marketplace for bidding and purchasing high-end luxury watches.
- **Shivam Yoga Studio** – E-commerce platform with integrated live yoga class streaming and subscriptions.
- **TripTrap** – Real-time travel app with Socket. Io-based communication and scalable architecture.
- **Starfarm** – Music streaming platform for web and mobile with integrated wallet functionality.
- **IGym & IGym Trainer** – Fitness apps upgraded with the latest Flutter packages and streamlined publishing.
- **aiTriage** – Scalable admin panel and REST APIs for managing medical triage workflows.
- **WayWay (SixTnc)** – Backend and admin platform with real-time updates using Socket.io.
- **OT Tracking** – Employee tracking system with live location monitoring and geofencing alerts.
